

DUP-P

Profile Wrapping Line

Features

- ▷ Modular base
- ▷ Frequency controlled drive
- ▷ 360 degrees wrapping capability
- ▷ In-line or stand alone

Economic Solution

The DUP-P series is an economic profile-wrapping machine. A graphic based interface for the operator is available and makes it easy to work with the machine. Multiple materials can be used on this machine. Interior and exterior products can be manufactured.

This machine type can be integrated into a production line.

A limited range of options is available for these machines allowing the customer to determine the level of automation. The modular design allows for a maximum of flexibility in machine configurations.
